Cover letter

Dear Editor,

Please find attached our manuscript entitled “Deep Learning-Based Word Translation Pipeline for Videos on Kathakali Dance” for consideration for publication in the ACM Journal on Computing and Cultural Heritage (JOCCH).

This manuscript presents a pipeline for translating Kathakali dance videos into the words they represent using deep learning. We collected a dataset of Kathakali dance videos, created an image classification model, developed a video classification approach, and finally proposed a novel algorithm based on the pipeline. Our focus is on the digital preservation as well as translation of this traditional performing art form.

Thank you for considering our submission.

Sincerely,

Navneeth Sreenivasan
on behalf of all authors
